Online Course Delivery Assistance *Embedding Videos within Blackboard*

Updated 3.21.2020

We have always discouraged uploading media (videos, images) to Blackboard as much as possible, but it is more important that ever now (so as not to burden the system with nearly the whole nation going to online learning) to embed, rather than upload, media (videos, in particular) within Blackboard.

Copying Video Embed Code

If using your own YouTube video (and it is most likely Unlisted), you will want to visit the video page to copy the Embed Code. Note: this first page can be skipped if you have already copied the embed code to your clipboard

- 1. Visit studio.youtube.com (your own unlisted videos cannot be found at youtube.com)
- 2. If you are not already signed in to your YouTube account, click the "Sign in" button in the upper-right corner, and sign in using your @lab.icc.edu credentials
- 3. Click the "Videos" button in the left navigation panel
- 4. Click on the thumbnail of the video you want to embed
- 5. Click on the video URL on the next screen,

- 6. On the next screen (which will play your YouTube video), click the SHARE button underneath the video
- 7. Click the "Embed" button
